

Regional Airline Association

2011 Anti-Drug & Alcohol Misuse Seminar

FINAL AGENDA

Note from RAA

Anti-Drug & Alcohol Misuse Seminar attendees are welcome to attend the Human Resources Seminar session on CHRC audits that will be held at 11:30am July 26th. Please consult that seminar agenda for the session start time.

Tuesday July 26th—

1:30 Introductions & Opening Comments – Dr. Donna Smith, FirstLab, Mary Ellen Petti, FirstLab & Liam Connolly, RAA

Attendees will introduce themselves and share a few interesting facts about their organization.

2:00 Session 1 – DOT Regulatory Update

Review of Regulatory changes in DOT testing. There were some significant changes in the DOT testing that were made in the latter half of 2010, but many of those changes go into effect in 2011. Dr. Donna Smith will review the top changes and what to expect.

3:00 Session 2 – Legislative Update

RAA VP Legislative Affairs – Faye Malarkey Black – will give an overview of the FAA Re-authorization status as well as a focus on the language that currently exists for Foreign Repair Stations, and other DOT items that affect D&A misuse.

3:30 Break – At this time attendees will begin to gather for departure to the Red Maple Restaurant. (RAA will be providing transportation)

4:00 Session 3- Reception and Tour – Alere Laboratories/The Red Maple Restaurant

RAA has secured an opportunity for the D&A consortium members to tour a local DOT testing facility. The Lab will sponsor a happy hour reception across the street from their facility and tours will be given during the happy hour. This will be a great opportunity for attendees to see the lab facilities up close, ask questions of the facility managers, and to have great conversations with their colleagues.

About Alere - Alere has over 30 years of experience in the substance abuse testing industry, providing timely and accurate services that deter and detect drug and alcohol abuse. We are a single-source solution for several types of testing using traditional and alternative methodologies. Our quality analysis includes traditional, laboratory-based and point of collection testing via urine or oral fluid. Alere's current inventory includes over 100 configurations of drug, alcohol, and specimen validity testing devices and a catalog of ancillary supplies, collection kits, chain of custody forms, and shipping supplies. In addition to providing these products, Alere uses its industry experience to deliver the same technical

information and service that clients have come to expect from Alere's lab-based services.

Day One Adjourns following Laboratory Tour/Reception

Dinner on Own

Wednesday July 27th –

8:00am – Coffee Available

8:30 Session 4 – Over Counter and Prescription Medication Policy and Practices (MRO Safety Concerns)

Learn about what your colleagues and the DOT say about Prescription Medication Policies, and share best practices. This has been a hot topic with the MROs as well as the carriers and should make for a very educational discussion.

10am – Break

10:30 Session 5– Craze Drugs – Kitchen Cabinet Drug Abuse

What are the other drugs that managers need to be on the lookout for? We have seen a rise in synthetic drugs, new variants of old drugs, and re-purposing of items found in the house. What are they? What should we be looking for? And what does this mean for our testing practices?

11:30 Session 6 – Quest Diagnostics Drug Testing Index and RAA consortium non-attributed statistics

Dr. Donna will share a re-cap of the stats, diagnostics, etc of what we are seeing in the field from the labs. What are the trends? Additionally FirstLab will provide non-attributed statistics on the RAA consortium. Lets see what the members are facing and have a discussion on what we are seeing.

12:30 Closing Comments / Seminar Adjourns

This is a business casual event
