

Courtney Miller
Director of Analysis
The Air Current

After nearly two decades in the industry, Courtney Miller has a breadth of experience spanning operations, sales, fleet and network planning, cargo planning, market forecasting, and data analytics. He is the Founder and Managing Director of Visual Approach, providing data and insights to the aviation industry. Courtney also provides analysis as Managing Director of Analysis for The Air Current.

Courtney was recently with Bombardier Commercial Aircraft where he coordinated aircraft transactions with both lessors and airlines in a sales capacity. Deeply committed to using analytics to find different perspectives, he led Bombardier's Americas airline analysis team for seven years, responsible for building analytical models and business cases in support of aircraft transactions.

Prior to joining Bombardier, Courtney spent time building expertise in cargo network planning and forecasting with DHL. He began his career as a pilot for Comair Airlines in Cincinnati, where he worked in local ALPA leadership, chairing the analysis committee.

Courtney earned his MS at Embry-Riddle Aeronautical University and his BS from Purdue University.
