

RAA
Regional Airline Association

2009 Annual Report

Who knew a 76-seat jet would move so many people?

More than 100 million people have flown E-Jets since the first EMBRAER 170 was delivered only a few years ago. It's a significant milestone for a proven platform with compelling economics. But a more important metric may be the passion E-Jets generate among airlines, passengers, and crews. Does your fleet inspire such devotion? If not, maybe it's time to make a move of your own.

Compare the operating economics of your aging fleet with E-Jets at www.eforefficiency.com.

Love What You Fly.

Report from the Chairman

Rick Leach

Dear RAA Members and Friends,

2009 has proven to be perhaps the most challenging year for the regional airline industry. Safety issues have been at the forefront, and as such, this year has stretched our bounds to make our industry even safer.

The Regional Airline Association (RAA) plays a key role in the success of the industry. Over the past decade, the RAA has helped its 32 regional airlines form a seamless operation with their major partners, and the organization has played an integral role in our nation's air system. Right now, more than 51 percent of daily flights are conducted by regional airlines, and we carry approximately one-quarter of our nation's passengers. Without our service, 77 percent of US communities would cease to have any air service at all. We have become a significant, and essential contributor to the airline industry and to the overall American economy. We employ some 60,000 professionals, and we greatly value their contribution to the regional airline industry.

Scheduled passenger service has evolved to where regional and mainline airlines operate seamlessly to benefit the traveling public. The passenger buys one ticket and expects one level of service, so there can be only one industry safety standard.

Aviation safety, by its very nature, is a shared responsibility. I know all the regional airlines work closely with other aviation stakeholders — our employees, our suppliers, other airlines and most importantly, the FAA — to identify and inventory their best practices and share it collectively. The RAA and the regional airlines have been doing this for almost 35 years.

I urge each of you to be proactive in sharing information that can make our industry even safer. We continue to be a growing industry, and we can and must continue to work better. Thanks to the RAA, we are pushing forward with safety initiatives and continuing discussions with key stakeholders. We have an unparalleled commitment to safety, and we look forward to addressing these issues and others at our 2010 Annual Convention in Milwaukee on May 24th through 27th.

On a more personal note, I want to extend my deepest thanks and appreciation for the hard work of the RAA Board and its staff members who have often assisted us over the past year working with Congress, the media and the public as we educate them about our industry. It has been an honor working for you and serving as your 2009 Chairman.

Sincerely,

Rick Leach

WHEN CONDITIONS ARE AT THEIR WORST,
YOU'RE AT YOUR BEST.

© 2009 Rockwell Collins, Inc. All rights reserved.

How do you complete the next flight safely, even in rapidly changing conditions? At Rockwell Collins, it starts by putting the vital information pilots need – Synthetic Vision, windshear, Traffic and Collision Avoidance System alerts and more – right in front of their eyes. Increased situational awareness and operational benefits that allow for a better response to even the worst conditions. Resulting in fewer delayed or cancelled flights.

Building trust every day

Foreword

from RAA President
Roger Cohen

Dear RAA Members and Friends,

People have asked me on countless occasions this year — amidst the tough press and the public scrutiny — if I still thought this was the best job in Washington, DC. The answer is a simple, unequivocal yes. Our entire RAA team shares that same passion about telling the true story about the achievements, contributions and total commitment to safety of our nation's regional airlines.

It is a well-known fact: flying is the safest form of travel. Airlines have gotten increasingly safer over each decade, regional airlines have helped lead this progress and we are committed to keeping it that way. Our members continuously address all potential issues, and they build, brick by brick, the culture of safety that is the fundamental cornerstone of the aviation industry. RAA's own Strategic Safety Initiative (SSI) continues to push for new advances in aviation safety, including examining the new frontier of human factors in order to avoid incidents in the future.

Our SSI will rely on science, impartial safety experts and our front line industry professionals to take a close look at any issue that could lead to an accident. Working closely with Congress, the FAA, industry and labor groups, the SSI's goals and initiatives will directly align with the steps that Department of Transportation Secretary Ray LaHood and Federal Aviation Administrator Randy Babbitt have called on for action.

Throughout this year, our member airlines have helped guide the valuable dialogue that Congress has urged and that the FAA has conducted. During these safety summits held across the country, we addressed our shared safety goals with our associates in labor, in government and with our mainline partner airlines. But this cooperative commitment to safety is not something new to RAA.

Improving safety was the driving force behind RAA's creation in 1975, and it has been our guiding principle ever since. Not just at our Annual Convention at which thousands of airline, supplier and government officials gather. Not only at the dozens of face-to-face meetings held each calendar year. But every day, RAA shares this critical safety information across the front lines of commercial aviation. Back in the day it was sent via mail. Then it was faxed, and today it's shared instantly in real time via the internet. And RAA has been doing it each and every day for the past 35 years. RAA has proudly nurtured regional airlines' unwavering commitment to safety, and in the coming months we will rededicate even more resources to promoting the highest safety ideals.

RAA has managed through difficult challenges in the past, and because of these collective efforts, our members are stronger and more importantly, safer today. Today's challenges have provided us with another opportunity to reflect back on times when we stood at the forefront of decision making for the aviation industry, and helped to make it better and safer for the American public.

Thank you for your loyal support which has helped to inspire and invigorate RAA this year. We are confident that by the time we meet in Milwaukee next May, our collective efforts will have proven to the public and policy makers alike the true facts about the safety, the professionalism and the importance of America's regional airlines.

A black ink handwritten signature of Roger Cohen. The signature is stylized, starting with a large 'R' and ending with a long horizontal line.

The ATR -600 is a glass cockpit aircraft benefiting from commonality across its modern product line

We make you feel like a big wheel.

Lufthansa Technik.

The right decision for your regional aircraft.

The following aircraft types will receive our full component support:

Q400, CRJ100/200, 700/900 and E-Jet: SCM, TCM and TCS®; ERJ135/145: SCM and TCM

Regional aircraft operators know that success is not a question of size. What matters is offering the right product on the right market. At Lufthansa Technik, we share the same view.

Did you know that we've been looking after a steadily growing number of modern regional aircraft for over 20 years? So whether you fly Bombardier, Embraer

or other types of regional aircraft, our all-round carefree service package will make your day.

It's all here—maintenance, full-range components supply, engine overhaul or landing gear service—all with the time-honored Lufthansa Technik seal of quality and the ultimate in flexibility at surprisingly fair rates. Which cuts out the surprises on your main-

tenance costs and keeps your investments to a minimum. Doesn't it make you feel good to have made the right decision? Let's talk about it.

Notes

- 2008 data are preliminary.
- Flight hours, miles, and departures are compiled by the Federal Aviation Administration.
- Since March 20, 1997, aircraft with 10 or more seats used in scheduled passenger service have been operated under 14 CFR 121.
- Years followed by the symbol * are those in which an illegal act was responsible for an occurrence in this category. These acts, such as suicide and sabotage are included in the totals for accidents and fatalities but are excluded for the purpose of accident rate computation. Table 12 contains a list of illegal act occurrences involving US air carriers for the period covered by this table. Other than the persons aboard aircraft who were killed, fatalities resulting from the September 11, 2001 terrorist acts are excluded from this table.

Notes

- 2008 data are preliminary.
- Flight hours, miles, and departures are compiled by the Federal Aviation Administration.
- Since March 20, 1997, aircraft with 10 or more seats used in scheduled passenger service have been operated under 14 CFR 121.
- Years followed by the symbol * are those in which an illegal act was responsible for an occurrence in this category. These acts, such as suicide, sabotage and terrorism are included in the totals for accidents and fatalities but are excluded for the purpose of accident rate computation. Table 12 contains a list of illegal act occurrences involving US air carriers for the period covered by this table.
- Based on a February 2002 FAA legal interpretation provided to the NTSB, any 14 CFR 135 operation conducted with no revenue passengers aboard will be considered an on-demand flight operation. This interpretation will be applied to accidents beginning with the year 2002. It has not been retroactively applied to 36 accidents, nine of them fatal that occurred during the period 1983 - 2001.
- US air carriers operating under 14 CFR Part 135 were previously referred to as Scheduled and Nonscheduled Services. Current tables now refer to these same air carriers as Commuter Operations and On-Demand Operations, respectively, in order to be consistent with definitions in 14 CFR 119.3 and terminology used in 14 CFR 135.1. On-Demand Part 135 operations encompass charters, air taxis, air tours, or medical services (when a patient is on board).

Navigating Your Performance

Our suite of business solution services includes:

- data entry
- data management
- data mining and analysis
- reliability and maintenance enhancement support
- operational and technical evaluations

Regional Aircraft Statistics

“ The ABACUS agreement provides Mesa with competitive and predictable costs for the repair and maintenance of our DHC8-200 parts inventory, while insuring higher levels of service than we currently experience. ”

Gary Appling, VP Technical Services & Purchasing Mesa Air group

We have a long history in leading the way. That's why we invented ABACUS.

Fokker Services is a front runner in innovative aftermarket support solutions, like the Performance Based ABACUS Component Availability Program, which has been running for over 14 years. Our supply chain solutions include:

- Supply Chain Management (including specific challenges for out of production A/C)
- Spare Parts Supply
- Component MRO Services
- Component Availability Services

Together with our US based subsidiaries Fokker Aerotron and Fokker Airinc, Fokker Services continuously explores new initiatives to expand the span of our support services and improve them.

The focus for these ongoing developments is improving affordability, reliability and availability of our customer's fleets. Fokker Services today serves operators with Fokker and Bombardier Dash 8 aircraft with our ABACUS program, and holds in-house Component MRO capabilities on Airbus and Boeing aircraft which already cover over 10,000 components.

Whether you need a comprehensive set of total aircraft conversion and support services, or a tailored package of MRO services, Fokker Services has all the skills and capabilities in house to exceed your requirements. ***Always innovating.***

US Airports and Regional Service, including Essential Air Service

(State by State Breakdown, including Alaska and Hawaii)

More capabilities. More support.

Whether you're maintaining your fleet, managing a supply chain or building an aircraft, AAR's products, capabilities and support help you accomplish more.

- ▶ **Maintenance, Repair and Overhaul**
- ▶ **Landing Gear Services**
- ▶ **Engineering Services**
- ▶ **Cargo Systems**
- ▶ **Composite Structures**
- ▶ **Precision Fabrication**
- ▶ **Commercial and Defense Logistics Support**
- ▶ **Airframe Parts Supply and Repair**
- ▶ **Engine Leasing and Parts Management**
- ▶ **Aircraft Sales and Leasing**

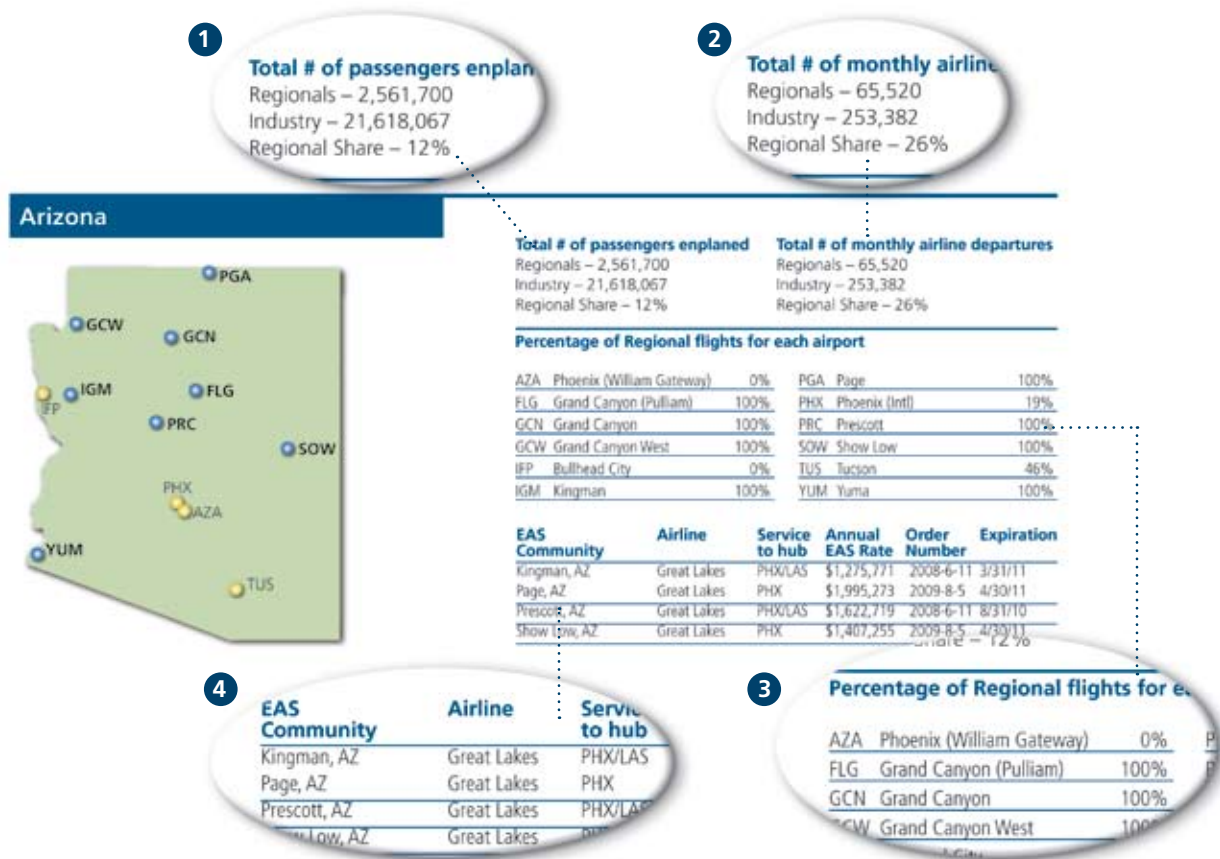

Maintenance, logistics or production, AAR can help you improve your efficiency and control your costs.

More capabilities, more support. More of what you need.

US Airports and Regional Service, including Essential Air Service

The following section includes both industry and regional airline specific departure statistics at the nation's Top 50 US airports (both in chart and map form), as well as a map showing those US airports served exclusively by regional airlines.

On page 32, an additional section begins with a state-by-state breakdown, including Alaska and Hawaii, of a number of key statistics. These include: **1) total number of passengers enplaned** in that particular state; **2) total number of monthly airline departures** and **3) percentage of regional flights** for each scheduled service airport in the state. This year's Annual Report also includes **4) Essential Air Service compensation** numbers listed by carrier and community for those states included in this government funded program. The data has been compiled by numerous sources.

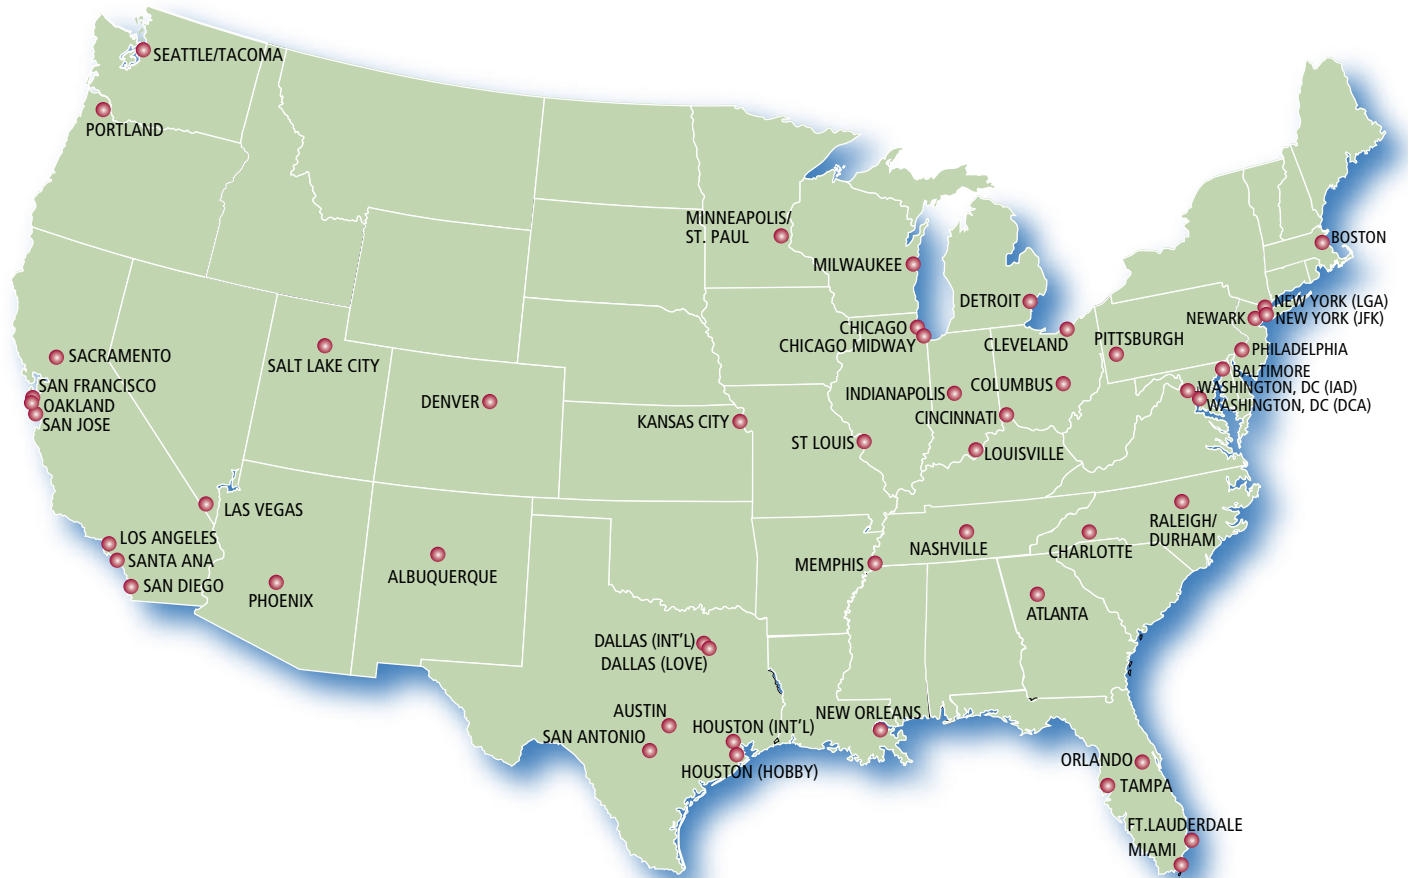

US Airports & Regional Service / EAS

History of the Essential Air Service Program

The EAS program was initially authorized for 10 years with funding provided by the General Fund of the US Treasury. It was modified and extended by the Airport and Airway Safety and Capacity Expansion Act of 1987 and was later made permanent as part of the FAA Reauthorization Act of 1996 with a standing annual appropriation of \$50 million. Subsequent legislation has supplemented this funding with additional appropriations from other FAA revenue sources, including foreign overflight fees and the Airport and Airways Trust Fund. The program has undergone numerous criteria adjustments since its inception, mainly limiting eligibility. At present, communities are no longer eligible for subsidized air service if they are located within 70 driving miles of an FAA-designated Large or Medium Hub airport, or if their per passenger subsidies exceed \$200. Communities located 210 or more highway miles from the nearest Medium or Large Hub airport are exempt from the subsidy cap.

Not That You Would, But You Could.

Introducing the Gen-X Electronic Flight Bag.

Now you can have all the benefits of a rugged, intuitive digital EFB system that features Class 3 connectivity with Class 2 pricing.

The GEN-X EFB is designed to withstand much more than the minimum FAA requirements--like extreme environments such as explosive decompression at high altitudes, wide temperature fluctuations and high vibration.

GEN-X offers a total solution that not only includes the EFB hardware, but a means to update manuals and charts seamlessly and accurately. Your overall operation will benefit by a product that provides an honest Return on Investment and requires minimal training. Give DAC a call to arrange for more information.

AMC Chair's Report

Associate Member Council Board July 2009

Another year passes and the tides of change have created closer bonds in our industry and stressed the importance of networking and collaboration. The associate members, comprised of manufacturers, distributors, service providers and consultants across the wide-range of products/services that airlines are partnered with, have shown that the strength of good business partners is a knowledge asset that equates to tangible benefits.

The Associate Member Council (AMC) mission is to represent the needs of the associate members of the Regional Airline Association, support airline member issues and promote the association industry-wide. Over 300 associate members are part of Washington, DC-based RAA supporting all aspects of our industry initiatives, from Capitol Hill to next generation technology.

The AMC goals for 2009 are:

- Participate in the development, lend resources and make recommendations within the RAA Board of Directors, staff and committees related to industry issues/positions.
- Support and enhance the access and exchange of expertise among associate members and regional airlines to meet technical and business needs
- Retain existing and attract new membership
- Promote educational/training opportunities for aviation students
- Grow the Annual Convention attendance, revenue and benefits for all participants

This year has brought about challenges on all fronts of our business. In spite of the conservative forecast for 2009, our Salt Lake City Convention provided the proving ground of success. The outstanding attendance numbers and new members provided an active platform of networking.

Also, we initiated some well-received changes to the Convention. The President's Preview of the Exhibit Hall prior to its official opening provided the opportunity to meet and overview our products and services. The AMC Booth was back in the Hall this year to promote the AMC representation and to gain feedback from our members. The Purchasing Forum was a tremendous success again.

Lastly, the Scholarship Fund drew more support this year through the Silent Auction. Over \$7,000 was raised to further educational opportunities of aviation students. I thank everyone who has supported this event.

In addition, AMC has made strides to promote and discuss the benefits of collaboration among the associate members and RAA committees to bring broader perspectives, input to the airline strategic managers and guidance towards our product development and innovation efforts.

The AMC relies on the support of the RAA staff and would like to extend a grateful "thank you" for their unending commitment this year in a tumultuous and daily changing battle to balance the challenges of the economic, political and regulatory environment. Also, thanks to the other 15 members of the AMC for their support and participation to better our industry.

The AMC looks forward to hearing from you to exchange ideas for support and direction. Look for new tools on the RAA website (www.raa.org)

Thanks again for your support and anticipate increased success for our future.

Sincerely,

Karla Cadden

FELLFAB Corporation

8815 Northcutt Road

Fairburn, GA 30213

(770) 969-6216

Fax: (770) 969-6218

Website: www.fellfab.com

RAA Representative: Becky Crider

Email: becky.crider@fellfab.com

FELLFAB® is a leading supplier of aircraft interior products to the world's aviation market. With more than 50 years experience in engineered textile products and three manufacturing facilities in North America holding ISO 9001:2000 and AS9100 certifications, FELLFAB® offers its clients the highest quality products in the industry. The product design team at FELLFAB® works directly with the airlines, aircraft manufacturers, and OEMs to provide custom tailored solutions to meet our clients' needs. FELLFAB®'s product line includes fabric and leather seat covers, cushions, curtains, carpet kits, and ground support equipment.

Perrone Aerospace

182 Riverside Drive

Fultonville, NY 12072

(518) 853-4300

Fax: (518) 853-4333

Website: www.perroneaero.com

RAA Representative: Billy Perrone

Email: bperrone@perroneaero.com

Perrone Aerospace is a full-service designer and fabricator of performance leathers and textiles for the aerospace market. America's only laser-guided, eater-jet cut parts process guarantees 100% Q.C. inspected dress-cover kits, and lower per-pax cost at a firm price. We manufacture lightweight, full-strength soft goods like FeatherWEIGHT™ Leather and burn-resistant SummaTex. Perrone leathers and textiles are AS9100 and ISO 2001 compliant. Our FAA 145, EASA approved repair station V1VR130X refurbishes and repairs leather dress covers. Original creative services feature over 100 gaufrage patterns by famed designer Daniel Duross. A full line of cleaning and maintenance-care chemicals round out Perrone's offerings.

Schneller, Inc.

6019 Powdermill Road

Kent, OH 44240

(330) 676-7125

Fax: (330) 673-6374

Website: www.schneller.com

RAA Representative: Barbara Keener

Email: bkeener@schneller.com

Schneller is a global leader in the development and manufacture of engineered decorative laminates and non-textile floor coverings for transportation and architectural industries. We serve aviation, rail, interior decor and display manufacturers, providing custom design, color matching, materials selection, continuous and sheet production from our ISO 9001 certified facilities. Our expanding palette of new materials and constructions provides customized solutions for today's demanding designs including, enhanced visual ambiance and brand building, safety and cost-effectiveness. A

Schneller hallmark is our ability to provide fast turnaround in meeting customer deadlines and to offer economical, minimum orders.

Torrington Distributors Inc.

43 Norfolk Street

Torrington, CT 06790

(860) 482-4464

Fax: (860) 482-8337

Website: www.torringtondistributors.com

RAA Representative: Keith Whitehill

Email: kwhitehill@torringtondistributors.com

Torrington Distributors is a licensed aftermarket provider for cut and sewn parts for one of the worlds leading seating product groups. Spare procurement on product may now be facilitated directly with the OEM provider at favorable costing with no certification amendments. We offer cut and sewn products sanctioned by FAA25.853.

Triumph Insulation Systems

2865 S Pullman Street

Santa Ana, CA 35222

(480) 275-2088

Fax: (949) 261-8384

Website: www.Triumphgroup.com

RAA Representative: Tom Cecil

Email: tcecil@triumphgroup.com

Triumph Insulation Services (TIS), ex The Mexmil Company, was recently acquired by the Triumph Group. Triumph Insulation Services is the OEM for acoustical and thermal insulation for all Boeing production aircraft as well as the "official" spares provider for insulation for Airbus. Triumph was recently awarded the A350 contract with Airbus as well. TIS also provides strip insulation blankets for the regional airline market. TIS' primary product in the regional market is the production of seat covers, carpet pieces and kits, plastic interior parts, as well as the overhaul and repair of seats, tray tables, and other plastic components.

Airframe Manufacturers and Sales

ATR North America, Inc.

45195 Business Court, Suite 450

Dulles, VA 20166

(571) 203-6900

Fax: (571) 203-6903

Website: www.atraircraft.com

RAA Representative: Kelly Creamer

Email: kcreamer@atrnorthamerica.com

ATR, Avions de Transport Regional, is a joint venture of two leading European aircraft manufacturers: EADS, France, and Alenia Aeronautica, Italy. The new ATR generation (the ATR 42-600 and ATR 72-600) is an efficient, comfortable and cost-effective family of aircraft, and is the most successful turboprop aircraft in production today. ATR's headquarters is in Toulouse with three regional centers: Washington D.C., Bangalore, and Singapore as well as a sales office in Beijing. The President of ATR North America is Guillaume Gasparrri.

Fax: (416) 373-5533

Website: www.aero.bombardier.com

RAA Representative: Barry MacKinnon

Email: barry.mackinnon@aero.bombardier.com

Bombardier Commercial Aircraft is a world leader in the design and production of aircraft that seat up to 145 passengers. Its mission is to provide a complete range of commercial aircraft optimized for best-in-class efficiency with the highest level of customer service. The product portfolio is comprised of three commercial aircraft families: for short-haul operations, the 70- to 80- seat Q400 NextGen airliner is a fast, fuel-efficient and lower-emission large turboprop. For medium-haul applications, the CRJ NextGen family of aircraft is a benchmark for regional jet efficiency in the 60- to 100-seat segment. For longer routes, the CSeries CS100 and CS300 airliners are the world's newest and most advanced single-aisle aircraft designed specifically for comfort and setting new standards in technology, fuel efficiency and reduced environmental impact.

Embraer

276 Southwest 34th Street

Fort Lauderdale, FL 33315

(954) 359-3700

Fax: (954) 359-4783

www.embraer.com

RAA Representative: Gordon Preston

E-mail: gpreston@embraer.com

Embraer is the world's leading manufacturer of jet aircraft solutions up to 110 seats, selling and providing after sales support for the global Airline, Executive, Defense and Government markets. Headquartered in Sao Jose dos Campos, Sao Paulo, Brazil, Embraer was founded in 1969 and privatized in 1994. Embraer is a worldwide company with subsidiaries in the US (Ft. Lauderdale, FL—Embraer Aircraft Holding, Inc, and Nashville, TN—Embraer Aircraft Maintenance Services), France, Portugal, China, and Singapore. Customers rely on rapid, responsive service from Embraer's global customer service team. With technologically advanced and cost-effective products, Embraer provides aircraft options engineered to meet the evolving needs of its customers. Embraer solidified its position as one of the world's largest aircraft manufacturers with its successful ERJ 145 family of jetliners (37-50 seats) and the EMBRAER 170/190 family of four aircraft ranging from 70-118 seats, which taps the gap between regional and mainline jet capacity.

Mitsubishi Aircraft Corporation

2-15, Oye-cho, Minato-ku,

Nagoya, Aichi 455-8555

-10944

Japan

Fax: 81-52-611-2217

Website: www.mrj-japan.com

RAA Representative: Reiko Iechika

Email: reiko_iechika@mjet.co.jp

Mitsubishi Aircraft Corporation has been

established after the program launch of the MRJ (Mitsubishi Regional Jet) in March 2008. MRJ is the next generation regional jet to be developed based on the technical maturity and confidence Mitsubishi Heavy Industries, Ltd (MHI) has achieved over the years through developing and producing both military and commercial aircraft. The aircraft will achieve the best combination of operating economy and cabin comfort.

SuperJet International Spa US Office

1625 I Street N.W.

Suite 1200

Washington, DC 20006

(202) 293-3433

Fax: (202) 293-0677

Website: www.superjetinternational.com

RAA Representative: John Buckley

Email: jbuckley@superjetinternational.com

SuperJet International, based in Venice, Italy, is a joint venture between Alenia Aeronautica, a Finmeccanica company (51%) and Sukhoi Holding (49%), is in charge of marketing, sales, customization and delivery of the Sukhoi Superjet 100 regional jet in Europe, the Americas,

Oceania, Africa and Japan, as well as of worldwide aftersale support.

SuperJet International is also responsible for the design and development of VIP and cargo variants.

A SuperJet International branch is already active in Moscow, together with sales offices in Toulouse, France and Washington, DC, USA. Designed, developed and built by Sukhoi Civil Aircraft Company (SCAC), the Sukhoi Superjet 100 family is comprised of 78- and 98-seaters in basic (SSJ100/95B and SSJ100/75B) and long-range (SSJ100/95LR and SSJ100/75LR) configuration. The SSJ100 is the most advanced and environmentally friendly new generation regional jet. Superior technical and operational characteristics make SSJ100 a fully marketable and competitive product – cost-effective, easy to operate and maintain. SSJ100 is a conceptually new platform designed specifically for a 100-seat segment offering the most efficient combination of regional efficiency with mainline capabilities.

The first SSJ100 was rolled out from SCAC's final assembly shop at Komsomolsk-on-Amur on September 26, 2007. First flight was successfully accomplished last May 19, 2008.

Avionics Manufacturer and Sales

ACSS, An L-3 Communications & Thales Co.

19810 N. 7th Avenue

Phoenix, AZ 85027

(623) 445-7000

Fax: (623) 445-7001

Website: www.acssonboard.com

RAA Representative: Steve Henden

Email: steve.henden@l-3com.com

ACSS, an L-3 Communications & Thales Company, is a leader in safety avionics systems that increase safety, situational awareness and efficiency for aircraft operators. Based in Phoenix, its products include the TCAS 3000SP and TCAS 2000 traffic alert and collision avoidance systems; a family of Mode S transponders; the T3CAS and T2CAS integrated surveillance systems; and TAWS+, a stand-alone terrain awareness warning system. The ACSS portfolio also includes a suite of ADS-B software solutions for pilots operating in the airport vicinity called SafeRoute. More than 45,000 units of ACSS product are operating in commercial, corporate and military aircraft.

Aero-Mach Labs, Inc.

7707 E Funston

Wichita, KS 67207

(316) 682-7707

Fax: (316) 682-3418

Website: www.aeromach.com

RAA Representative: Craig W. Harris

Email: charris@eromach.com

Some of the greatest names in aviation depend on Aero-Mach Labs for aircraft instruments and fuel system components. Founded in 1971, in Wichita, Kansas, Aero-Mach has become one of the industry's most recognized and trusted sources for aircraft instrument repair and overhaul. As a manufacturer of instruments and

cabin display signs, Aero-Mach offers a world-class measure of quality assurance to every customer we serve.

CMC Electronics Inc.

Heads Up Technologies

2033 Chennault Suite 100

Carrollton, TX 75006

(972) 980-4890

Fax: (972) 980-4843

Website: www.heads-up.com

RAA Representative: David Groos

Email: dgroos@heads-up.com

Heads Up Technologies designs and manufactures digital electronic solutions for the aviation industry. Some of our products include: XM Satellite Radio offers up to 170 channels of music, news, sports and comedy programming. The system offers the flexibility of providing individual passengers their own channel selections or, for crew selection of pre-determined channels.

XM WX Satellite Weather provides comprehensive, high-resolution weather data continuously delivered to your cockpit. Service is for the continental United States and a large portion of Canada. LED Lighting systems increase your reliability and significantly reduce ongoing maintenance issues. Up/Down wash lights, reading, dome and modular accent pieces are available. Pre-Recorded Announcement Machines (PRAMs) provide passenger safety briefings and can reduce flight attendant workload while improving the quality of presentation and comprehension.

Kollsman Commercial Aviation Systems

220 Daniel Webster Highway
Merrimack, NH 03054-4844

Website: www.absoluteaviation.com
RAA Representative: Al Garr
Email: agarr@absolute-av.com

Absolute Aviation Services Winner of the A.F.A. Governors Aerospace Company of the Year Award in 2008 FOR WASHINGTON STATE Absolute Aviation is a FAA approved Part 145 Repair Station, worldwide provider of component maintenance, repair, overhaul, and engineering services for commercial aviation. Absolute's cost-control solutions, ranging from electrical, electronic, and accessory repairs to reliability and value-added engineering services, allow us to provide innovative product improvement solutions around the globe. Absolute Aviation offers value-added engineered solutions such as DER and PMA/STC repairs, to significantly reduce the expense for standard component repairs and convert the biggest high-cost and high-removal expendable items into repairable-type components, which we have coined Extendables. Absolute™ product improvement approach has a proven track record of reducing Mean Time Between Failure (MTBF) and Cost Per Flight Hour (CPFH) on Rotable, Repairable, and Expendable components. Absolute Aviation is a trusted product improvement repair solution for many airline industry leaders such as Empire, Mountain Air Cargo, Calm Air, FedEx Feeder, Delta, American, and Allegiant. Located in Spokane, Washington, Absolute Aviation began operations in 2004 and has grown into a shared 20,000 square foot state-of-the-art research and repair facility housing 25 full-time employees.

Accel Aviation Accessories, LLC

Email: dale.gabel@ultreya.biz

As an Authorized FAA Repair Station with airframe and limited power-plant approval, Applied Aerodynamics is an engineering driven team with hands-on experience on all facets of Aerospace manufacture and repair. Recently certified to ISO 9001-2000 Standard, we specialize in the repair/overhaul of Flight Control Surfaces. Cowls, Panels, Fairings, Doors, Engine Cold-Section, Inlets, Thrust Reversers and Radomes.

Applied Aerodynamics operates a modern 115,000 sq. ft visual factory. Autoclaves, large-capacity ovens, lay-up room, phosphoric anodize line and paint booths allow us to manage every aspect of repair and overhaul processes. Our in-house dedication team provides synergy to

make AAI a world class solution provider. Our in-house Tooling and Machining Departments allow us to fabricate our own tools and hard to locate piece-parts. This translates to faster turn around times and lower cost for our customers.

ATR Aircraft Transparencies Repair

4955 East 10th Avenue

Hialeah, FL 33013

(305) 825-7721

Fax: (305) 825-1923

Website: www.1atr.com

RAA Representative: Susie Weltmann

Email: susie@1atr.com

ATR Aircraft Transparencies Repair, operating since 1998, is an Approved FAA Repair Station, specializing in the overhaul/repair of glass and or acrylic aircraft windshields, windows and navigational light lenses for the aerospace industry. This includes services for commercial, cargo and regional airlines and the corporate, general aviation, helicopter and military markets. ATR's FAA approved patented processes allow us to repair/overhaul transparencies that other repair stations would normally BER. Our success rate to restore the windshield/window to 8130 tag status is approximately 40% with the cost being approximately 60% of new, providing our customers a tremendous savings. This, along with our vast experience and available inventory, makes Aircraft Transparencies Repair the most quality oriented window repair facility available.

Kulpsville, PA 19443

Website: www.gtweed.com

RAA Representative: Lisa James

Email: ljames@gtweed.com

As a world-class leader in high-performance materials and customized-engineered components, Greene, Tweed leverages expertise in a variety of markets to provide our customers with innovative and cost-effective solutions to their performance challenges. Greene, Tweed's engineered components are found worldwide in the most demanding high-performance civil and military platforms. In fact, 90 percent of the world's commercial and military aircraft depend on Greene, Tweed components. Because of our design expertise, we customize solutions that leverage our extensive applications experience and knowledge of elastomers and thermoplastics. In the air or on the ground, absolute sealing integrity and component performance is essential. Our sealing assemblies are used in landing gear systems, flight control systems and fuel systems while our custom structural components--engineered and manufactured from high-performance thermoplastic materials--perform in engines, on aircraft platforms and in demanding bearing assemblies for suspension systems. Greene, Tweed provides added reliability and performance in the service critical and challenging Aerospace environment. Our global reach combined with local responsiveness ensures that Greene, Tweed's customers remain a step ahead of their competition.

NAASCO Northeast Corp. concentrates on Regional Airline Aircraft Starter Generators and Power Relays and also does substantial work for major airlines, helicopter, and other large aircraft operators on these and other electrical components. Our exclusive ETR (Electrographitic Treated Resin) improvement programs enhance starter generator performance by drastically reducing armature wear and, in many instances, by increasing brush life by more than 50%. Saab 340 and Beech 1900 operators especially benefit greatly by implementing NAASCO's unparalleled Sil-Met overhaul and repair processes for power distribution relays and contacts. By taking advantage of these programs, operators can expect the delivery of quality products and services, without delays, and at an attractive price. NAASCO holds FAA and JAA certification and is registered with C.A.S.E. #551.

Website: www.rci-safety.com

RAA Representative: Ron Demaray

Email: ron.demaray@rci-safety.com

RCI has been providing businesses with innovative safety solutions for over 20 years and is used in over 3000 locations across North America. Our web-based management software helps companies close the information loop by utilizing real time information to implement and control safety and quality management systems.

Companies can identify leading indicators using our behavior based safety recording and reporting system. Our incident reporting and investigation program can maintain all pictures and documents in one location. Document management and versioning of documents are benefits of the RCI applications. Analyze your information using charts and graphs; export them for corporate reports, management and safety meetings. Our integrated system brings all the elements of your safety and quality management system together. We help you close the loop for maximum performance and continuous improvement in safety and quality. Observe, Report, Analyze, Act, Educate, Measure and Implement.

Our customers include FAA-approved repair stations, regional and air transport airlines, corporate jet operators, fixed base operators (FBOs), military, and OEMs.

BKD Aerospace Inc.

972 East Tuttle Road
Ionia, MI 48846-8606
Website: www.bkdaerospace.com
RAA Representative: Dale Forton
Email: dforton@bkdaerospace.com

BKD Aerospace Inc. is dedicated to enhancing the capability of airlines and airport terminals to emplane and deplane persons with reduced mobility (PRM) in a safe, dignified manner. The manual process of lifting persons with reduced mobility from ground wheelchairs to aircraft aisle fitting chairs, and subsequent lifting from aisle chairs to seats, causes a high risk of injury to ground staff as well as potential injury to the person with reduced mobility. The Amazon stair climber is designed to assist PRMs in boarding and disembarking from the aircraft to the tarmac. The Amazon transports PRMs safely and with dignity, while protecting staff from musculoskeletal strains associated with awkward lifting. The AURORA lift transfers PRM's from their wheelchair in the terminal, then down the jet bridge onto the aircraft. They are then lifted by the AURORA into any one of 3 seats on the right side of the aircraft. The AURORA has the ability to go from aircraft aisle the next connecting gate and onto the next aircraft without having to leave the unit. Both units offer an efficient, safe and dignified solution to both the airline personnel and the customer.

Regional Protective Solutions

Protective Solutions For Aircraft Rotables

Radome Container

Lightweight weather-tight Radome container, for all RJ nose cones.

DOT31FP Certified Cases

Lighter weight HM224B Laboratory Certified Cases for Oxygen Cylinders

Oxygen Bottle Containers

ATA Specification 300 Category 1 Containers. Provides protection for regulators and valves.

Tire Tote Bag

Double wall container for heavy duty protection. Custom interiors for larger regional brakes.

Wheel & Bearing Protection

Protect wheels from nicks and gouges. Spreads impact forces over the sturdiest parts of the wheel.

Cat 1 Container

Part-specific custom interior included in ATA Cat. 1 containers.

Brake Shipper

Durable, stackable, lightweight and economical. Custom-designed protection for regional brakes.

Battery Case

Rotationally molded and leak resistant for transport or storage. Certified for shipping UN 2795.

Custom built to suit any battery.

Bearing Seal

Lock out moisture and debris. Keep unretained bearings in place.

BOMBARDIER

THE BOMBARDIER COMMERCIAL AIRCRAFT FAMILY

CSeries: optimized single-aisle mainline solution

Q400 NextGen: optimized turboprop solution

CRJ NextGen: optimized regional jet solution

optimized

comfort, efficiency & emissions

Bombardier Commercial Aircraft is a world leader in aerospace innovation. The CRJ Series is the most popular regional jet program in history. The Q400 airliner is the world's most technologically advanced turboprop. And the recently launched CSeries is setting new standards in technology, cabin comfort, fuel efficiency and reduced environmental impact. Bombardier offers a superior flying experience for passengers and reduced emissions for everyone.
